WORK EXPERIENCE

Software Engineer

Cognizant Technology Solutions India Private Limited

09/2021 - Present

Navi Mumbai. India

Achievements/Tasks

- Developed and maintained Java-based web services to enhance functionality and optimize performance.
- Wrote efficient and scalable code to meet project requirements, focusing on clean coding practices and adherence to coding standards.
- Created and executed JUnit test cases to ensure the reliability and robustness of the codebase, facilitating seamless integration and deployment processes.
- Designed and implemented stored procedures to optimize database operations and enhance data retrieval and manipulation processes.
- Contributed to code reviews and participated in team meetings to discuss project progress, identify issues, and propose solutions for continuous
- Actively involved in troubleshooting and debugging activities, resolving technical issues promptly to minimize downtime and ensure uninterrupted service delivery.
- · Assisted in the documentation of technical specifications, user guides, and deployment procedures to facilitate knowledge transfer and ensure comprehensive project documentation.

PROJECTS

OPLD (Original Package Level Details) (01/2023 - Present)

- Description: An application that takes in a raw Commspec from either an HTTP POST request from CMS or from an MQ queue from internal UPS applications, validates their segments, updates our transmission control database to avoid duplicates, and publishes them to their appropriate gateway queue.
- Technologies: Java. Spring boot. Restful Webservices. MvSOL. Junit. Jenkins. Agile. Sonarqube, Apache camel.
- Key responsibilities: Evaluated project requirements and specifications. Responsible for project execution with Agile models. • Presented task length estimates to seniors and successfully delivered product within time window. • Deployment of the latest code from GIT to the server environment through Jenkins. • Ensuring smooth delivery of the project to client

UPS iHub-portal integration (01/2022 - 12/2022)

- Description: An application that takes input as HTTP POST request from internal UPS applications, validates their segments and input data and send response Json to client.
- Technologies: Java, Spring boot, Restful Webservices, Apache Camel, Jenkins, Agile,
- Key responsibilities: Monitoring the iHub APIs alerts in Google logs and to write a query to fetch the log data. • Testing iHub APIs on postman and create postman collection for different environment. • Maintaining daily statistics document for successful API's calls and unsuccessful APIs calls data. • Completed maintenance on existing iHub APIs programs. • Deployment of the latest code from GIT to the server environment through Jenkins. • Ensuring smooth delivery of the project to client.

SKILLS

Technologies

JAVA, Spring Boot, Spring Rest, SQL, Junit HTML,CSS, JavaFX

Database

MySQL, SSMS

Webservices

Restful

IDE and Tools

Eclipse, IntelliJ, Spring Tool Suit, Tableau, Postman, MySQL Workbench, Visual Studio, GIT, Maven, IBM MQ Explorer, Loginsight, Jenkins, Openshift

EDUCATION

 Bachelor of Engineering -Computer Engineering Pillai HOC Collage of Engineering and Technology

07/2018 - 05/2021 CGPA 7.71/10

Diploma in Engineering -**Computer Technology** Government Polytechnic Pen, **MSBTE**

07/2014 - 05/2017 Marks 71.88%

Secondary School Certificate Maharashtra State Board

05/2011 - 03/2014 Marks 80.20%

LANGUAGES

English, Hindi and Marathi Full Professional Proficiency
